

21SHARES

About 21Shares

21Shares, a Swiss company, takes innovation to the next level with the largest suite of cryptocurrency exchange-traded products (ETPs) in the world. In 2018 it pioneered the world's first cryptocurrency index listing on the SIX Swiss Exchange, and it continues powering its cryptocurrency franchise with cutting-edge research and groundbreaking approaches to product strategy.

21Shares aims to provide all investors with an easy, secure, and regulated way to buy, sell, and short cryptocurrency through existing bank and brokerage accounts. The 21Shares issuance platform, Onyx, is used by both 21Shares and third parties to issue and operate cryptocurrency ETPs around the world.

As of October 5, 2021, 21Shares manages more than \$2 billion in 17 cryptocurrency ETPs and 77 listings, including the world's only ETPs tracking Binance, 3 Crypto Index Basket and two ETPs with investor staking rewards (Tezos and Solana). Its products are listed on eight regulated European (Xetra, Euronext) and Swiss (SIX) trading exchanges.
